

Businesses with smaller amounts of commercial waste can sometimes get overlooked by the services of large waste hauling corporations. The specialized needs of our customers in the Southern Tier region of New York and Northern Pennsylvania are addressed with flexible schedules and a wide range of special needs equipment. All the trucks in our fleet are equipped with GPS which allows us to record the exact time of day service was provided and respond quickly to special service requests by immediately identifying trucks in close proximity to your business. For over 30 years Taylor Garbage has been providing local businesses with the top quality service they deserve.

Property Management Solid Waste Collections

Taylor Garbage prides itself in the many relationships we have established with property management companies and individual associations in Broome and Tioga Counties. Through dependable service and consistent fair pricing, Taylor strives to grow with your company and provide cost effective, worry free service.

Management companies enjoy doing business with Taylor Garbage because wherever your property is in the triple cities, you work with the same account executive. You will never have to deal with multiple representatives over the lifetime of our relationship.

Industrial Waste

Taylor Garbage offers site specific industrial waste collection and disposal services for all types of industrial waste created as a result of construction, demolition and reconstruction projects.

Our industrial collection fleet is equipped with professionally trained and experienced operators who are trained to deal with industrial waste and green disposal. This training provides us the ability to be more responsive to the demanding and changing waste disposal needs of our customers. We have equipment that is designed to meet the everyday needs of our industrial customers.

Our industrial roll off service includes:

- Temporary, on call and scheduled collection services
- Roll Off Containers - 10, 15, 20, 30 and 40 cubic yard containers
- Special waste collection and disposal
- Green waste removal
- Container delivery within 24 hours
- Same day service

Just for Contractors

Taylor Garbage can help you with your LEED (Green Project) building certifications. By utilizing our industrial recycling programs you can gain LEED points in your waste disposal efforts.

The LEED (Leadership in Energy and Environmental Design) Green Building Rating System™ is a voluntary, consensus-based national standard for developing high-performance, sustainable buildings. It is a self-assessing measurement tool, based on a point system, which focuses on a number of design and construction strategies aimed at reducing a building's environmental footprint. The rating system is divided into five environmental categories with opportunities for innovation credits as well. The accumulation of credits or points, awarded for compliance with requirements defined by the rating system, determines the level of certification of that building - certified, silver, gold, or platinum. For more information about the U.S. Green Building Council and to access the complete LEED rating system and updates, please visit www.usgbc.org.

Visit our website at www.TaylorGargabage.com for Leed Disposal Specifications.

Become a Customer
